

PROFESSIONAL SUMMARY

Results-driven Full Stack Developer with 3 years of experience in web application development. Proficient in utilizing modern technologies such as React, Next.js, C#, MongoDB, MySQL, GitHub, Azure DevOps, and various deployment options such as AWS and Digital Ocean to create efficient and user-friendly solutions. Committed to delivering high-quality, scalable applications that meet organizational needs and enhance overall performance. Experienced problem-solver who has helped decrease lead times by 25% in an e-commerce business as well as .

EMPLOYMENT HISTORY

JAN, 2024 - PRESENT

R&D Developer (Full Stack), Atser Systems, Remote

- Collaborated on an Agile development team to deliver scalable, cloud-based solutions deployed using AWS Lambda, RDS, and EC2 containers.
- Developed and maintained full-stack web applications using C# with occasional Python and Golang for the Backend, PostgreSQL for data management, and Next.js for the frontend.
- Consistently wrote clean, efficient code in C#, JavaScript, and PL/pgSQL to implement and optimize new features.
- Built and deployed microservices on AWS Lambda, ensuring high availability and performance across the system.
- Integrated PostgreSQL databases with AWS RDS, optimizing queries and database performance for application efficiency.
- Implemented secure, responsive user interfaces using JavaScript and Next.js, improving overall user experience.
- Participated in code reviews and Agile sprint planning to deliver quality solutions in a timely manner.
- Collaborated with cross-functional teams to ensure smooth deployment and continuous integration using AWS tools.

NOV, 2021 - JAN, 2024

Full Stack Developer, Apex Gaming PCs, Remote

- Collaborate with cross-functional teams to develop and maintain web applications for internal inventory management, reporting, e-commerce, and productivity systems.
- Design and implement responsive user interfaces using React and Next.js, ensuring optimal user experience across various devices and platforms.
- Leverage MongoDB and MySQL databases to store, manage, and retrieve data efficiently, enabling seamless integration with back-end systems.
- Utilize GitHub for version control and collaboration, ensuring consistency and maintainability of codebases.
- Develop and execute deployment strategies to ensure smooth and timely releases of new features and updates.
- Manage and maintain Linux server environments, optimizing performance and security to support business requirements.
- Actively participate in code reviews, providing constructive feedback and incorporating suggestions to continuously improve code quality and maintainability.
- Assist in troubleshooting and resolving technical issues, ensuring minimal downtime and optimal system performance.
- Participate in an Agile team environment completing sprints in a timely and well executed manner. Develop innovative solutions to enhance user experience and drive customer engagement.

EDUCATION

DEC, 2019 - AUG, 2022

Bachelor's in Computer Information Systems, Devry University, Remote

Graduated Summa Cum Laude

SKILLS

JavaScript/TypeScript

HTML/CSS

ReactJS

NextJS

NoSQL/MySQL/POSTGRESQL

API/Backend

Git

C#
